

# Exercise

## Download and Install ArcGIS Pro

Section 1 Exercise 2

08/2017

## Download and Install ArcGIS Pro

### Instructions

Use this guide to install and sign in to ArcGIS Pro.

### Time to complete

Approximately 10-15 minutes.

### Software requirements

ArcGIS Pro version 2.0.1

## Introduction

As part of the *Earth Imagery at Work* MOOC, you are given access to ArcGIS Pro for the duration of the course to use for completing course exercises. This exercise provides information on downloading, installing, and setting up the trial version of ArcGIS Pro v2.0.1.

Licensing for ArcGIS Pro is managed through ArcGIS Online. You will use the same ArcGIS account you used to sign in to ArcGIS Online in the previous exercise to access ArcGIS Pro. Be sure to use the account we've set up for you for this course so that you can access the data and maps that are necessary for completing the exercises, and so you'll be able to share your work with the rest of the MOOC students as part of the *Earth Imagery at Work* organization.

## Get started with ArcGIS Pro

The steps to get started with ArcGIS Pro vary based on whether you already have ArcGIS Pro installed, if you need to install ArcGIS Pro for the first time, or if you are unable to install.

This exercise is organized into the following three sections:

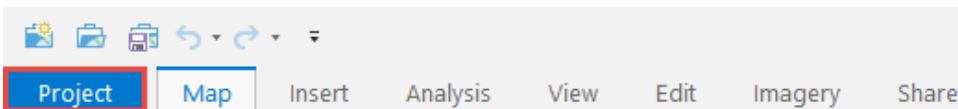

- If you already have ArcGIS Pro installed and need to verify which version you are using
- If you need to install ArcGIS Pro for the first time
- If you cannot install ArcGIS Pro 2.0.1 because of system requirements or other reasons

Refer to the section that applies to your situation.

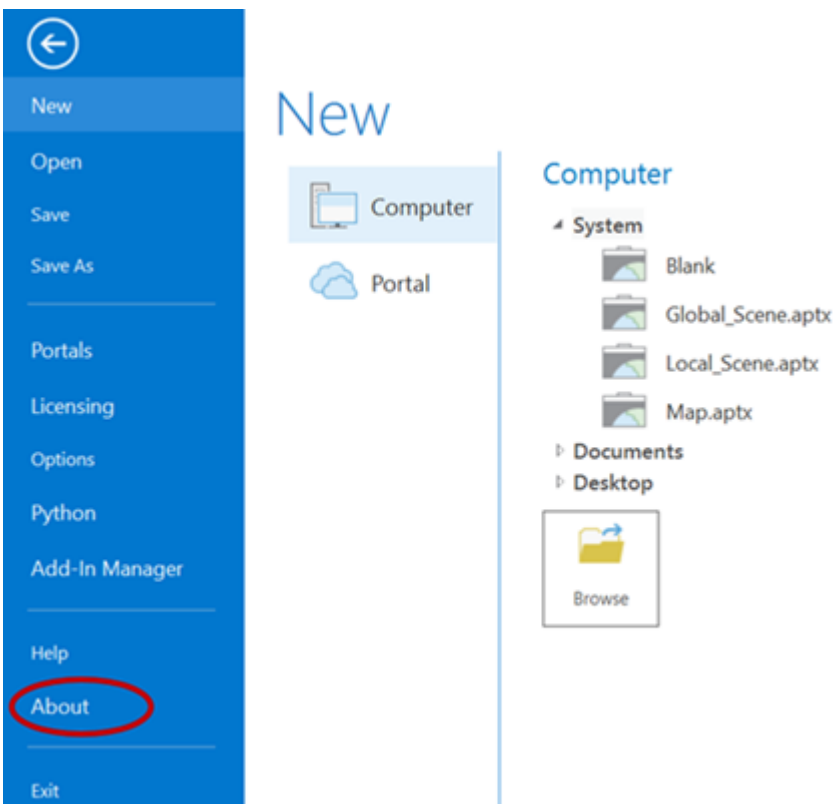

### If you already have ArcGIS Pro installed and need to verify which version you are using

If you already have ArcGIS Pro installed on your computer, you will need to ensure that you are using version 2.0.1. To verify which version you have, perform the following steps:

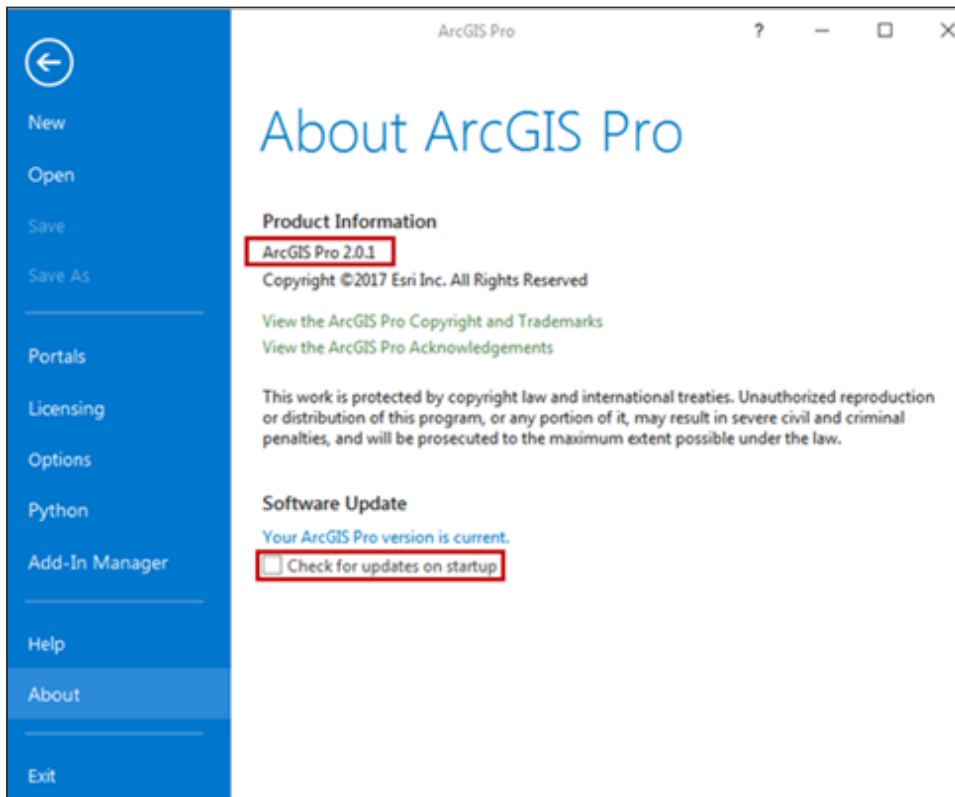

1. With ArcGIS Pro running, click Project.

2. Click the About tab.

The first line under Product Information tells you which version you have. If you have ArcGIS Pro 2.0.1, make sure the box next to Check For Updates On Startup is unchecked, and then you are finished with this exercise.

### If you need to download and install ArcGIS Pro for the first time

If you do not already have ArcGIS Pro installed, you will need to download and install it.

1. Review the [ArcGIS Pro system requirements](#).
2. After confirming that your computer meets the system requirements, open a browser tab and go to the [MOOC Download page](#).
3. Sign in using your ArcGIS account credentials, which are the same credentials you used in the previous exercise to sign in to ArcGIS Online.

*Note: The Section 1 Exercise 1 PDF explains how to determine your ArcGIS Online credentials (username and password) for this course. If you have trouble signing in, email [gistraining@esri.com](mailto:gistraining@esri.com) for assistance.*

Need an ArcGIS Public Account?

An ArcGIS Public Account is a personal account with limited usage and capabilities and is meant for non-commercial use only.

[CREATE A PUBLIC ACCOUNT](#)

If you have signed up for an [Esri Account](#), you have automatically been given access to an ArcGIS Public Account and you can use the same sign-in credentials for both.

4. On the MOOC Download page, click the Download button for ArcGIS Pro.

*Note: The file is almost 1 GB, so it may take some time to download depending on your Internet connection.*

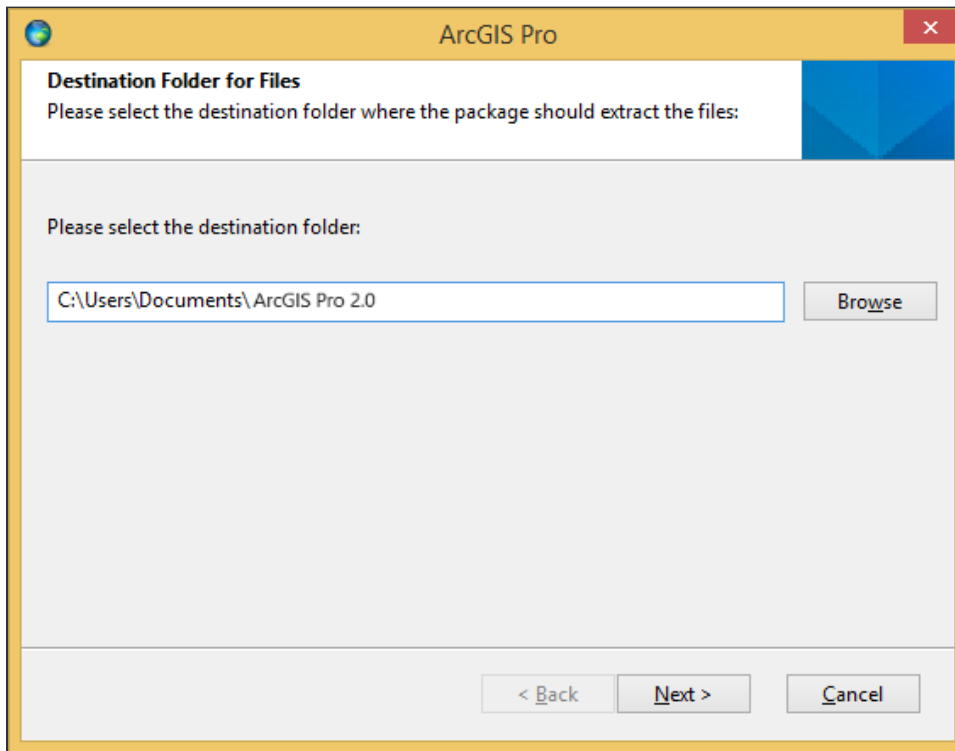

A prompt to save the file will display.

5. Click Save File to save the file to your computer.

*Note: Depending on your web browser, you may be prompted to choose where the file will be downloaded. Most browsers download to your computer's Downloads folder by default.*

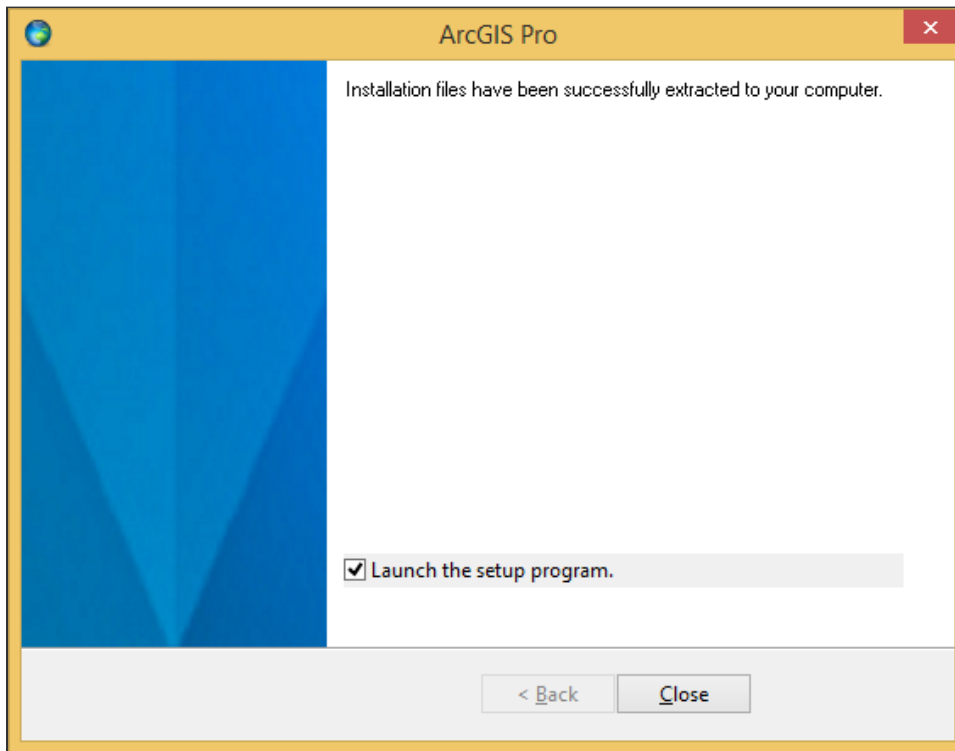

6. When the download finishes, locate the downloaded file on your computer.

7. Click Run to open the ArcGIS Pro installer.

8. Click Next.

The files will begin to unpack. After that is finished, the following screen appears, indicating that the installation was successful.

9. Leave the box checked next to Launch The Setup Program, and then click Close.

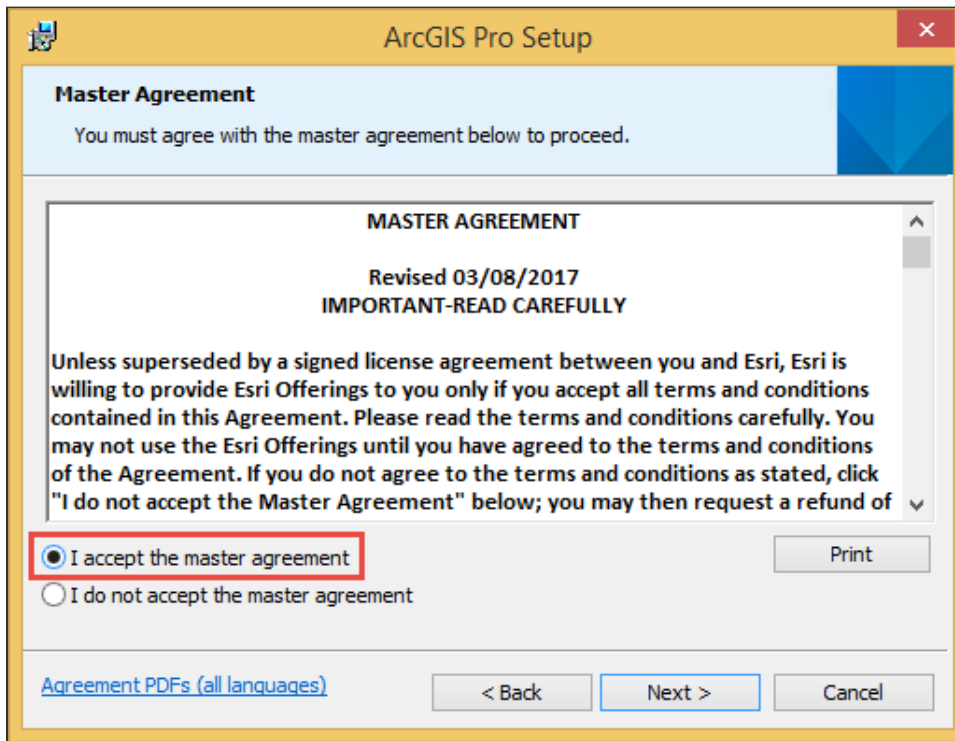

The ArcGIS Pro Setup window opens.

10. Exit any other Windows programs that are currently running (other than the reader you're using to view this PDF), and then click Next.

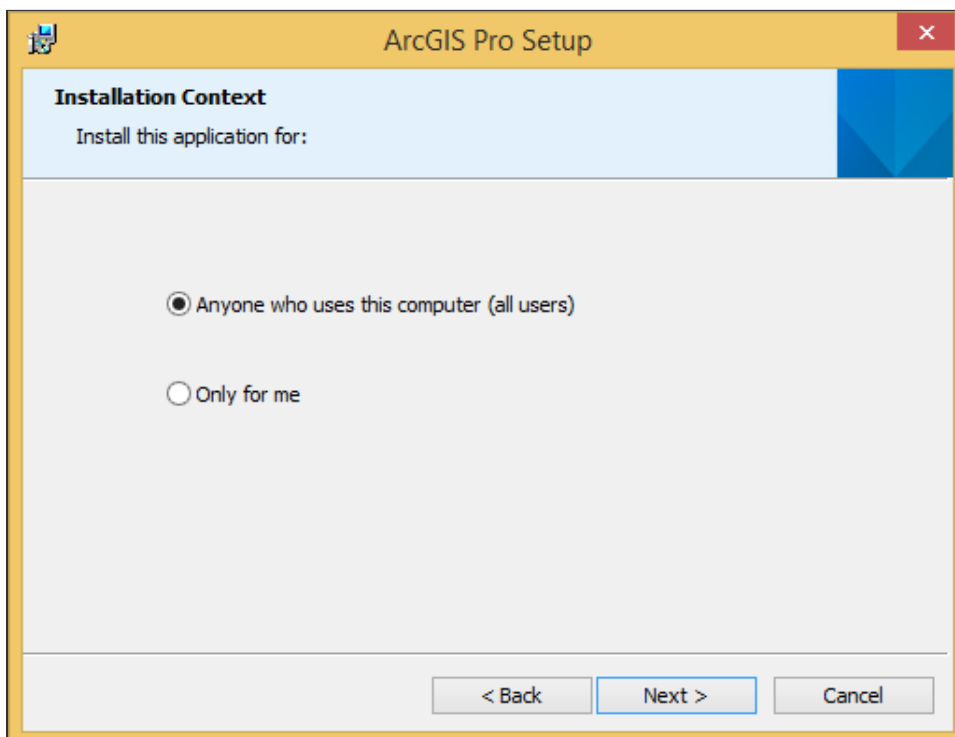

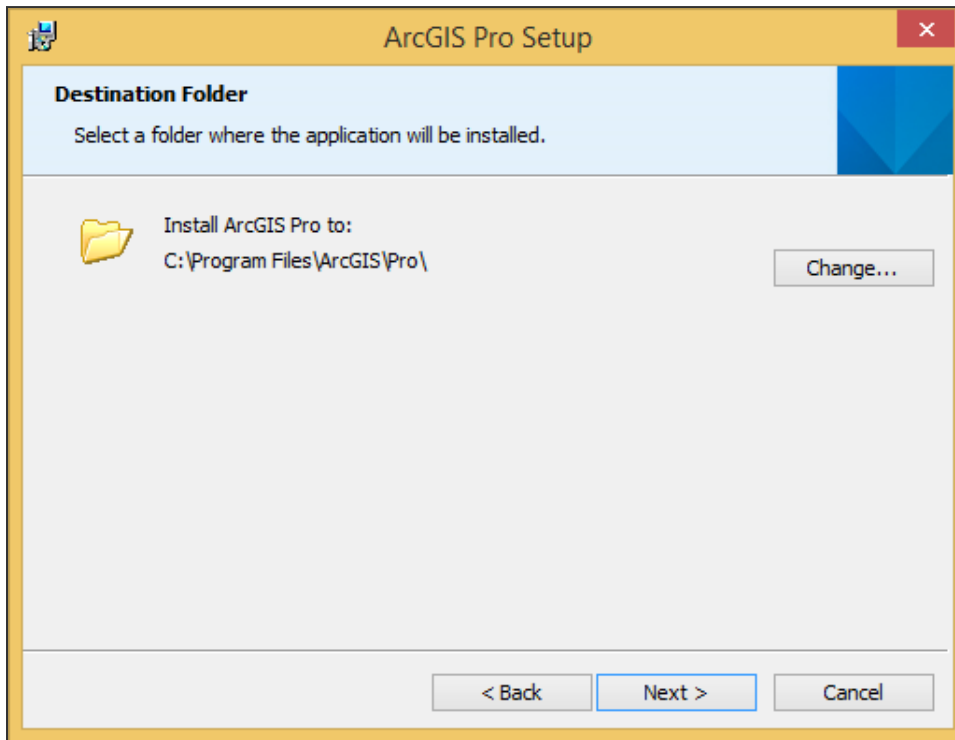

11. On the next screen, click the option next to I Accept The License Agreement, and then click Next.

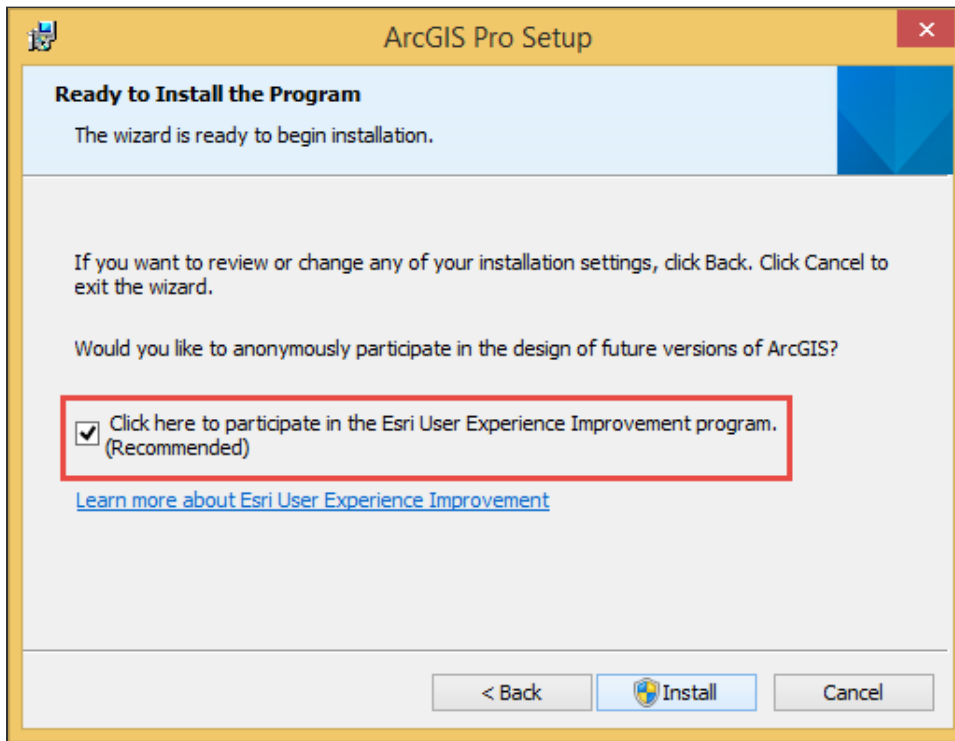

12. On the Installation Context screen, accept the default setting, and click Next.

13. On the Destination Folder screen, accept the default setting, and click Next.

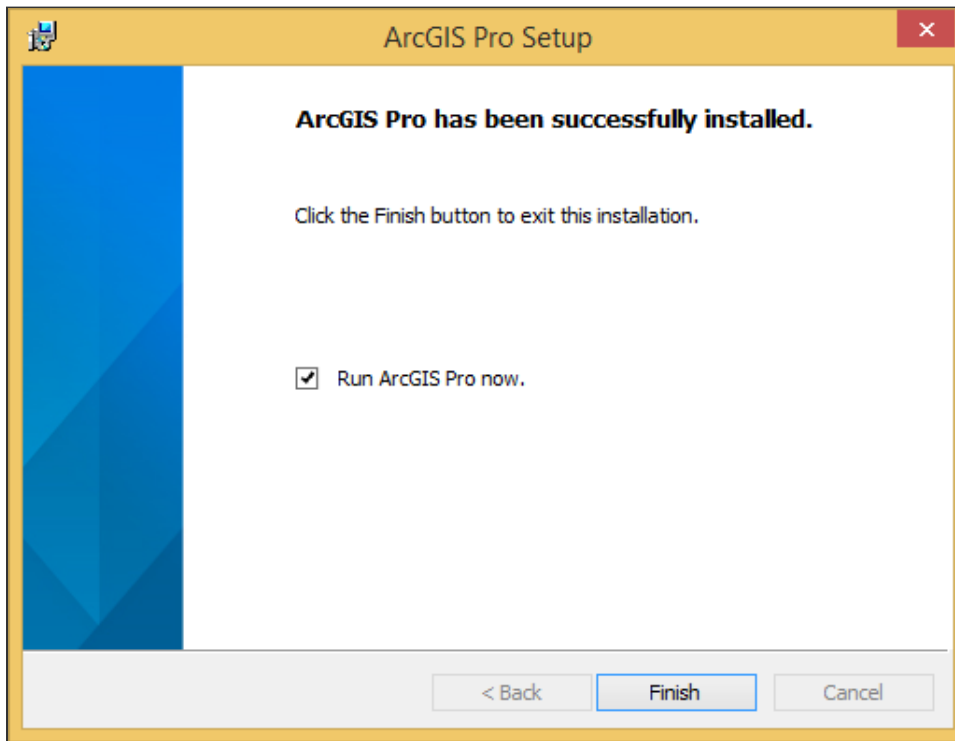

14. On the Ready To Install The Program window, keep the box checked next to Click Here To Participate In The Esri User Experience Improvement Program, and then click Install.

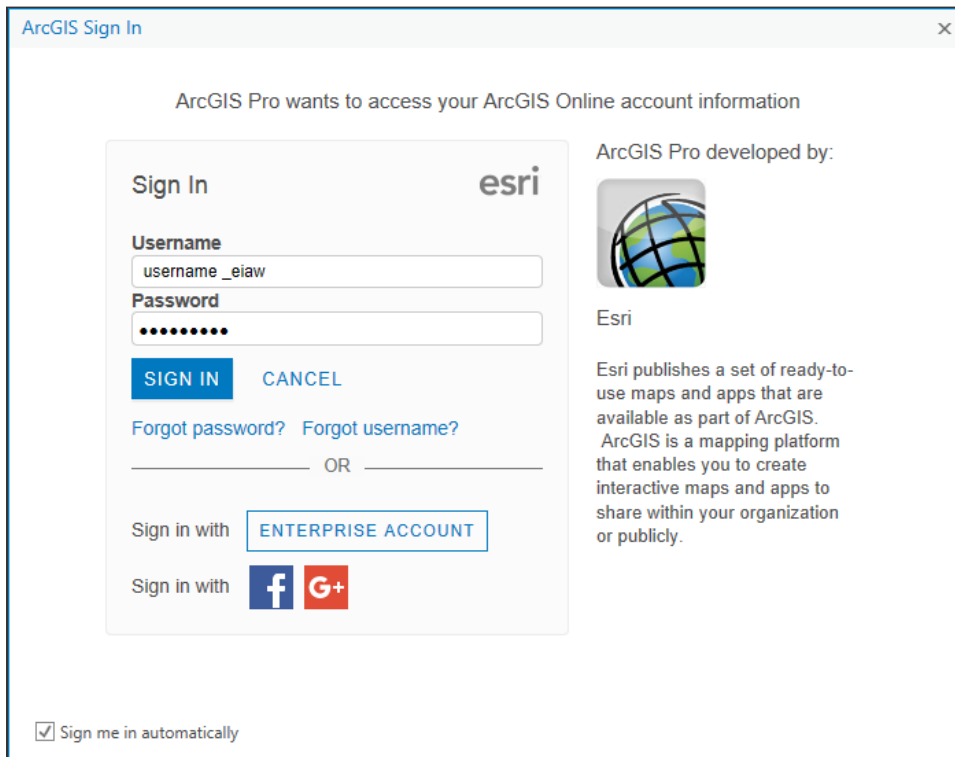

15. If prompted to allow ArcGIS Pro to install, click Yes.

After the installation is successful, you will see the following screen.

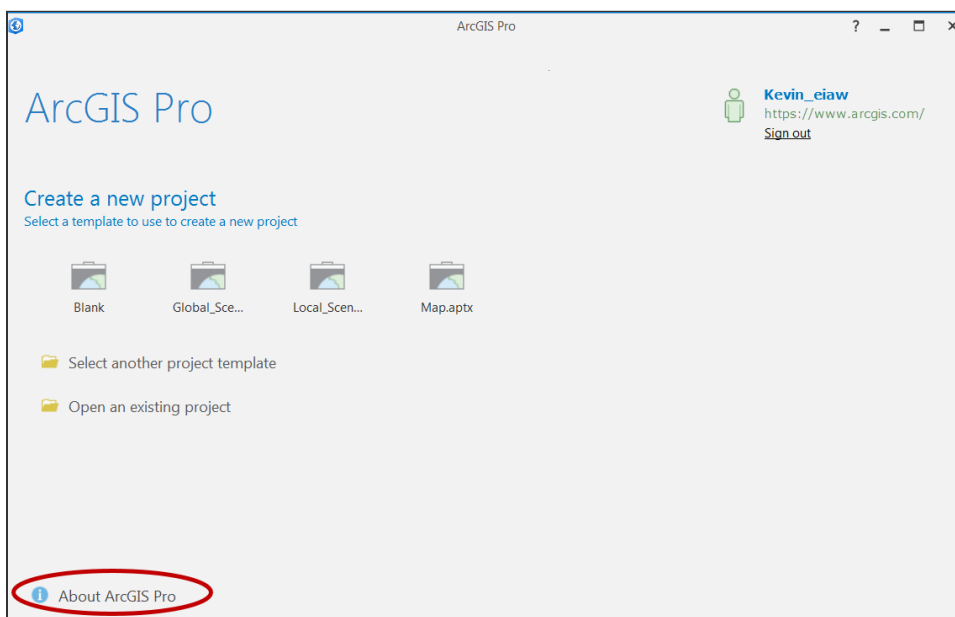

16. When the installation is complete, click Finish to open ArcGIS Pro.
17. Sign in to ArcGIS Pro using your ArcGIS account credentials (the same set of credentials that you used to sign in to ArcGIS Online; the username ends with \_eiaw) to sign in to ArcGIS Pro.

*Note: If you have trouble signing in, email [gistraining@esri.com](mailto:gistraining@esri.com) for assistance.*

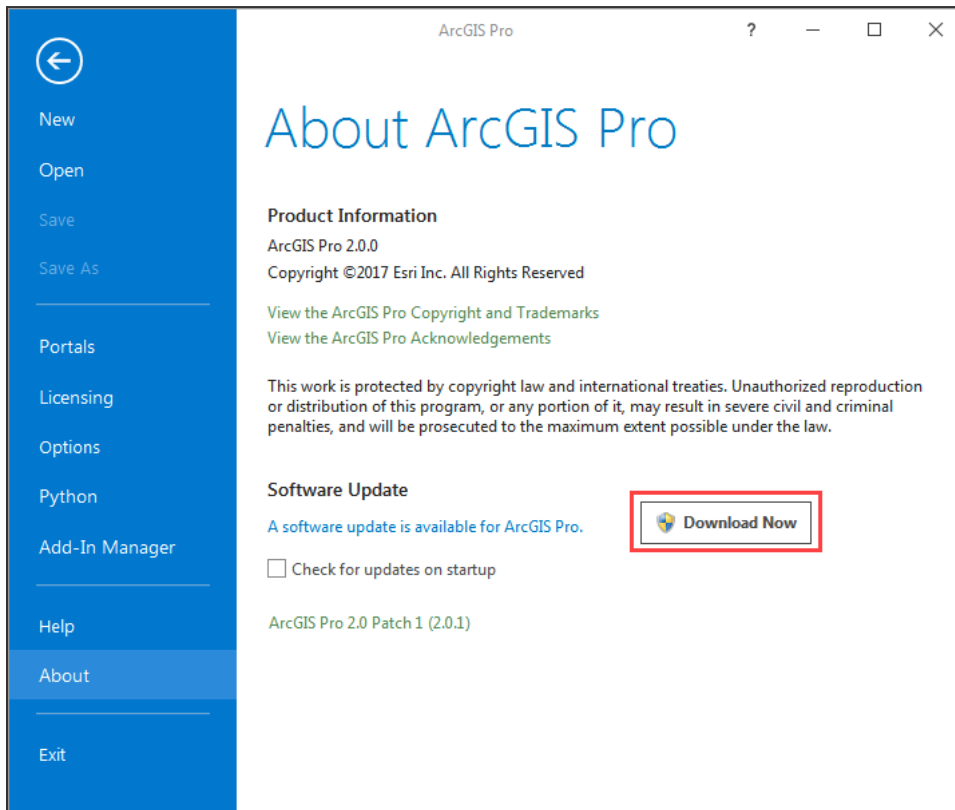

Once you've signed in, you will download a software patch to update ArcGIS Pro to version 2.0.1.

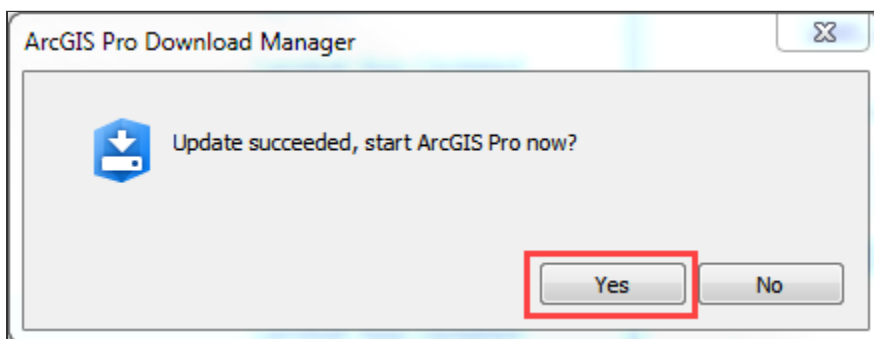

18. In the bottom left corner of the initial ArcGIS Pro page, click About ArcGIS Pro.

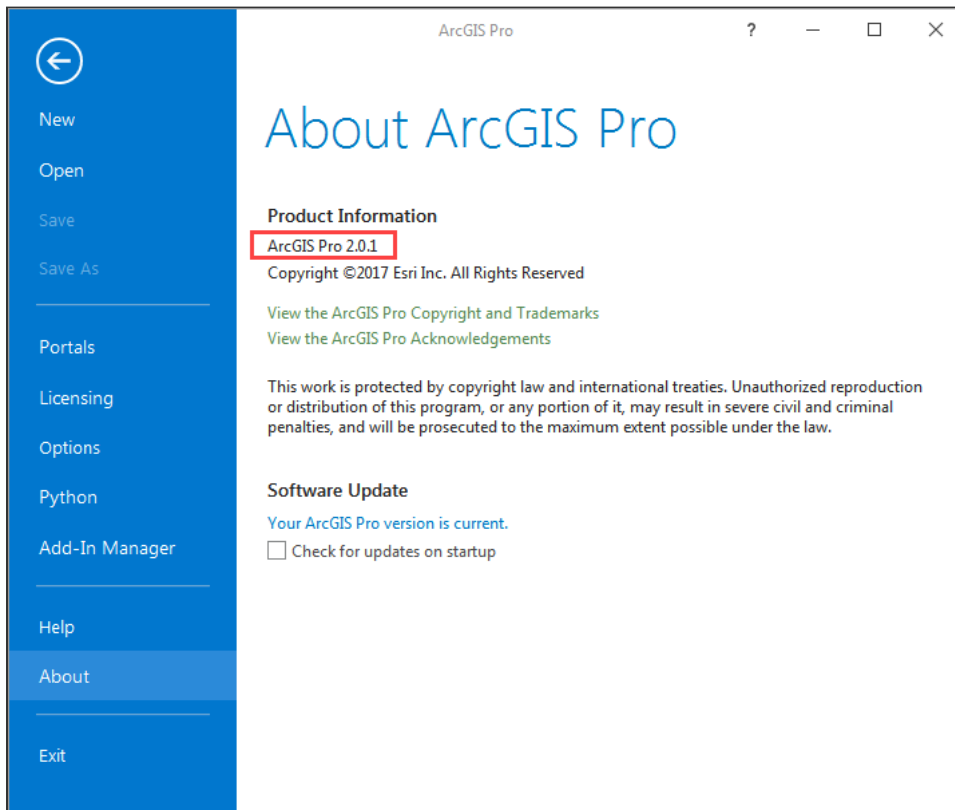

19. Click Download Now to install the ArcGIS Pro 2.0 Patch 1 (2.0.1).

20. In the Download Manager dialog box, click Yes to start ArcGIS Pro after the patch is successfully installed.

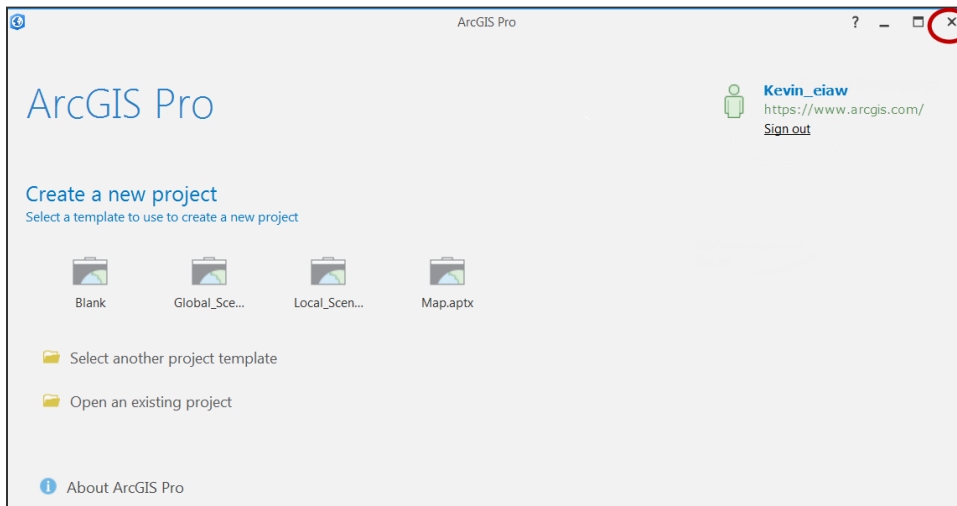

21. To confirm that you are now running version 2.0.1, at the bottom of the initial ArcGIS Pro page, click About ArcGIS Pro again.

If you are new to ArcGIS Pro, don't worry; the exercises will cover how to use it. For now, you've successfully signed in and verified that your ArcGIS account works with ArcGIS Pro. After you're signed in, you have confirmed that your account credentials work.

22. Use the Back arrow at the top left of the window to return to the initial ArcGIS Pro page.
23. When you are finished with the installation, in the upper-right corner of the ArcGIS Pro window, click the X to close the application.

*Note: If you would like to learn more about ArcGIS Pro, you can access [About ArcGIS Pro](#) for terminology and user interface information and [ArcGIS Pro Help](#).*

### **If you cannot install ArcGIS Pro because of system requirements or other reasons**

You will still be able to complete the course exercises that use ArcGIS Online, even if you cannot install ArcGIS Pro.

### **Conclusion**

After you've successfully downloaded, installed, and confirmed that you can sign in to ArcGIS Pro, you are ready to move on to the next exercise in this section.
